

SK ALL ALUMINUM BOXES ARE
THE PERFECT BALANCE OF STRENGTH,
DURABILITY AND STYLE...TURN HEADS FASTER.

TURN HEADS FASTER

SK TOOL BOXES were born from the grueling demands of the racing industry where high performance products deliver the competitive edge.

INTRODUCING THE
SK TOOL BOX.

56" Oversized Caster Mobile Pit Cart | Part # 56562

- Dimensions:** 56"W x 48.5"H x 30" D
Capacity: 7707 Sq. In., 33,008 Cu In.
- 9 drawer Flip top lid with industrial quality gas struts
 - 2000 pound per caster load capacity
 - 250-500 pound rating per drawer (500 pounds on full width and deep drawers)
 - Sealed ball bearing casters
 - 10" diameter 5" wide flat free tires on billet aluminum rims
 - Premium non-slip drawer liners
 - All Aluminum Construction

56" 9 Drawer Roller Cabinet | Part # 56561

- Dimensions:** 56"W x 43.5"H x 30" D
Capacity: 6,396 Sq. In., 29,520 Cu In.
- 1000 pound per caster load capacity
 - 250-500 pound rating per drawer (500 pounds on full width and deep drawers) with full extension ball bearing slide
 - Premium non-slip drawer liners
 - All Aluminum Construction

48" 9 Drawer Roller Cabinet | Part # 56481

- Dimensions:** 48"W x 43.5"H x 24" D
Capacity: 3,956 Sq. In., 18,469 Cu In.
- 1000 pound per caster load capacity
 - 250-500 pound rating per drawer (500 pounds on full width and deep drawers) with full extension ball bearing slide
 - Premium non-slip drawer liners
 - All Aluminum Construction

40" 6 Drawer Mobile Work Center | Part # 56401

- Dimensions:** 40"W x 42.75"H x 24" D
Capacity: 4,657 Sq. In., 20,266 Cu In.
- 1000 pound per caster load capacity
 - Flip top lid with industrial quality gas struts
 - 5" deep inverted storage tray
 - 250 pound rating per drawer with full extension ball bearing slide
 - Premium non-slip drawer liners
 - All Aluminum Construction

1600 S. Prairie Dr.
Sycamore, IL 60178 USA

1-800-822-5575
www.SKhandtool.com

Made in U.S.A. of US components and globally sourced drawer slides. Efforts are being made to find a domestic source for slides.

ALL ALUMINUM CONSTRUCTION

Aircraft Grade Aluminum delivers unsurpassed strength and durability. SK Tool Boxes have fused these properties of aluminum with an innovative design that delivers what top mechanics need. This has redefined the tool box category.

GREATER STRENGTH

The aircraft industry demands high performance components with a higher strength-to-weight ratio than steel. Military grade 6061 extruded aluminum frames maximizes the structural strength and rigidity of the SK Tool Box while being 30% lighter than traditional steel.

EXTREME DURABILITY

The same high fatigue strength aluminum that gives boat hulls rigidity to power through rough seas has been unleashed in the SK Tool Box. These boxes were designed and tested by professional racing mechanics under the most intense conditions. The technician is the backbone of a team and they rely on their tool box to deliver consistent performance in the most extreme conditions.

MAXIMUM CORROSION RESISTANCE

Aluminum delivers superior corrosion resistance to steel in the toughest environments. Aluminum alloy's excellent resistance to corrosion makes it particularly well suited to ship building and marine applications. Aircraft rely on aluminum at 40,000 feet, ships depend on it in the corrosive salt environments in the middle of the oceans and race cars utilize it in aluminum engine components and fuel systems to handle volatile high performance fuels and lubricants.

THE PERFECT BALANCE OF STRENGTH, DURABILITY AND STYLE... TURN HEADS FASTER.

Military Spec Aluminum Frame Construction

6061 aluminum alloy delivers unsurpassed structural strength and rigidity with 30% less weight.

Easy-Open MotionLatch™

Every drawer is fitted with the MotionLatch™ handle, which securely locks when closed and can be opened with just ONE FINGER even while wearing gloves or carrying tools.

Maximize Drawer Load

All drawers include smooth operating heavy duty ball bearing slides rated to 250-500 pounds per pair with higher rating utilized on full width and extra deep drawers.

Maximum Storage Capacity

Innovative design allows for a full-size drawer depth that extends to the back of the tool box to maximize storage capacity.

Easy Access Lids

Tool boxes with lids are all fitted with gas assisted shocks to ensure easy opening and a smooth, controlled close.

Lifetime Durability

Tough, baked-on polyester powder coat finish features one of the thickest and most durable finishes on the market – designed to last a lifetime.

Aircraft Aluminum Body Panels

5052 aluminum endows strength, durability and corrosion resistance not found in any other tool box and ensures a lifetime of performance.

Secure Transport

Built in removable D-Ring tie downs are included on all SK Tool Boxes.

Radius Corners

Extruded radius corners provide a sleek, streamlined appearance and prevents scratches, scraped knuckles, and snagged clothing.

Oversized One-Ton Casters

Tool boxes with oversized casters provide a capacity of 2,000 lbs. per caster for a total box load rating of 8,000 lbs!
